First, by erecting for them fire-proof houses, well lighted, substantially built, and thoroughly drained, in localities where such erections will serve both as examples to future builders and also as centres for the collection of a population calculated to exercise beneficial effects, morally and physically, on the surrounding districts.

Secondly, By allowing the repayment of the cost of such dwellings to be spread over a given number of years, at an annual sum not exceeding the rental usually paid for the mere occupancy of houses, similar in size, but not equal in safety, soundness, and convenience to those built by this company.

The primary object of the company is the improvement of the dwellings of the industrial classes, for which purpose eligible sites have been secured, but they are ready to receive applications for houses of a superior description.

No capital will be called up unless full employment for it has been previously provided; and, as the company's securities will increase in value every year, perfect safety will characterise its operations. From the peculiar facilities possessed by the company, a liberal dividend will be returned on the capital invested, in no case less than five per cent.

Application for shares, also in erecting houses, &c., to be made at the temporary offices, 36, Basinghall-street, where prospectuses and every information may be obtained.

PRIZE MEDAL IRON SHUTTER.

BUNNETT AND CO., ENGINEERS.

ORIGINAL PATENTEES OF REVOLVING IRON SHUTTERS,

Respectfully recommend their

NEW PATENT CURVILINEAR REVOLVING IRON SHUTTER,

For which the PRIZE MEDAL of the GREAT EXHIBITION has been awarded.

This Shutter is far superior in STRENGTH, DURABILITY, and APPEARANCE to the CONVEX or any other Revolving Iron Shutter. The adoption of the terms of Bunnett and Co.'s advertisements, and the imitation of their various works, without regard to quality, has given rise to many complaints, and tended in some degree to bring such works into disrepute; many persons not being aware that there are other makers.

Bunnett and Co. have therefore made such improvements and additions to their extensive plant of machinery as will enable them successfully to compete with the lowest prices of other makers, without impairing the well-known quality of their own works, and they earnestly solicit a comparison of their New Patent Revolving Iron Shutters with any others, which will at once prove them to be the best and very much the cheapest in the end, and a saving of great and constant annoyance by their not getting out of order.
